KUSCH+CO
by Nowy Styl

Architectural seating with a straightforward, warm and elegant design. The upholstered benches are suited for places where people meet and engage in conversation in a laid-back atmosphere. For foyers, lounges, or waiting areas in hotels and the hospitality industry, in golf clubs, in health care facilities, residential care and nursing homes, hospitals, and many other contract environments.

Design by Dieter Kusch

After having completed his training as furniture maker, he went on to study at the Technical College for Wood Engineering, where he soon showed a keen interest in design. Dieter Kusch started working for the family business in 1963, and took over the company in the second generation in 1969 after his father's untimely death. Apart from his function as managing director, he was personally involved in the development and design of new series.

Variations

5050 Armchair with wooden-frame

The gently arched wooden frame of these armchairs is entirely manufactured from solid beech, featuring a comfortably upholstered seat pad.

5050/3

5050/3

5060 Armchair with high back, with wooden-frame

This variation features a high backrest. In addition, for the upholstery of the series Vega, you can choose between either elegant darts or knobs.

5060/3

5060/3

5050 Bench with wooden-frame

The bench is an extension of the armchair with a low back, so to speak. With measuring more than 150 cm in width, either two or three persons can comfortably take a seat.

5055/5

5070 Armchair with metal-frame

The armchair's upholstered pads appear to be floating on top of the slender sled-base frame. On request available with a practical swivelling glass table top on the side, e.g. to put down a drink or a book.

5073/3

5073/3

5070 Bench with metal-frame

Two up to three persons can take a seat on this bench. Characterised by the same design language as the armchair, the bench appears to be floating. Optionally available with a glass table top on the side.

5078/5

Product data

5050 Armchair with wooden-frame

Accessories

- Upholstery with knobs (not available for the kuschmed® Hygienic-Line line-up)
- Upholstered arm pads
- Plastic glides
- Felt glides
- Protect glides
- Seat height either 42 or 45 cm
- Optional seat height 50 cm

Weight: 17.5 kg

5060 Armchair with high back, with wooden-frame

Accessories

- Upholstery with knobs (not available for the kuschmed® Hygienic-Line line-up)
- Upholstered arm pads
- Plastic glides
- Felt glides
- Protect glides
- Seat height either 42 or 45 cm
- Optional seat height 50 cm

Weight: 19.5 kg

¹ The DIN seat height was determined acc. to DIN EN 1335-1, i.e. the seat height measured by means of a measuring device at the position of the ischial tuberosity (sitting bones) after having placed a load of 50 kg on the half width of the seat.

Materials, finishes

5050 / 5070 Vega

Frame, arms

- Natural beech or stained acc. to standard collection (wooden-frame models)
- Chrome or satin chrome steel (metal-frame models)
- Open side parts (wooden-frame models)
- Upholstered arm pads (only for wooden-frame models except for kuschmed® Hygienic-Line models)
- Upholstered side parts, upholstered arm pads (metal-frame models)

Seat, back

- Upholstered pads with darts, fabric from standard collection
- On request upholstered pads with knobs, fabric from standard collection (not available for kuschmed® Hygienic-Line models)
- Optionally available with upholstery with flame retardant foam resp. flame retardant foam and fireproof fabric
- Seat underside waterproof upholstered (kuschmed® Hygienic-Line models)

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention or hygiene regulations. Kusch+Co has worked out individual solutions:

Fire Prevention

Wooden parts

As standard, wooden parts are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of “low flammability” acc. to DIN EN 13501 B s2 d0.

Upholstery

The upholstery is optionally available with flame retardant foam. In addition, it is available with the Kusch+Co Fire Prevention Concept, consisting of a special fabric “flamline” (approved by the building authorities and A2 nonflammable according to DIN 4102) between the upholstery foam and the fabric.

This concept achieves four life-saving objectives. The seating:

- is self-extinguishing,
- reduces the smoke development,
- prevents an incipient fire from spreading out,
- does not turn into an additional ignition source.

Test reports in compliance with national and international standards document the laboratory fire tests conducted on different series finished with a wide variety of materials.

With regard to the upholstery, e.g. with leather, artificial leather as well as many textile fabrics, or to our unupholstered variations featuring a plywood, laminated or plastic seat shell, most of our series meet the following standards:

- Germany: DIN 66084 P-a
- France: NF D 60-013
- Great Britain: BS 5852 Crib 5
- Italy: UNI 9176
- Europe: EN 1021 part 1/2

Please contact us if you wish to receive the test reports.

Hygiene

kuschmed® Hygienic-Line

Products from the kuschmed® Hygienic-Line provide an unfavourable breeding ground for bacteria, germs, and mildew. For this purpose, this range is conceived without open-pored veneers, slits in the backrest, improper upholstery, finger traps, open frames, felt glides, or materials that degrade upon contact with disinfectants.

Only fabrics with specific properties, e.g. hygienically impervious fabrics as well as water- and dirt-repellent finishes, qualify for this product line. Fabrics made of nano-coated fibres as well as disinfectant-compatible fabrics are also used.

The surfaces have to be smooth and pore-free, impervious to liquids and germs, and growth-inhibiting for bacteria. All wooden surfaces are entirely sealed with a special high-density, pore-free and disinfectant-resistant lacquer with antibacterial properties. Metal surfaces are sealed with a chrome finish or with a silver-bearing, anti-bacterial powder coating. The silver ions within the coating are activated upon contact with bacterial colonies, diffusing at the surface, denaturing the cell walls of the bacteria, and thus inhibiting their growth.

Quality, sustainability

Excerpt

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

All variations of series 5050/5070 Vega meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we test most of our contract seating with higher loads and cycles. On request, we conduct individual tests acc. to the customer's specifications.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure "Mission Statement Quality" providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.

Environmental Product Declarations are available for all series, in accordance with DIN EN ISO 14021 Type II, providing more information about all environmentally relevant aspects, including the Credit Points for the LEED certification of a building. Please contact us for more information.
