

creva stool

KUSCH+CO

At the very first glance, these stool variations stand out through their excellent stability. The dominant seat is supported by four legs. The design language is entirely based on a circular geometry, resulting in a clear-cut, minimalist look. The line-up consists of stools or bar stools, available with either a wooden or metal frame, complemented by a wooden-frame stool bench featuring an upholstered seat.

Variations

Creva stool on 4 wooden legs

This stool is entirely made of solid beech. The seat is ergonomically shaped, slightly concave above, and tapered underneath. The bar stool has the same construction as the stool, however adapted for sitting at a counter or high tables. The footrest offers a pleasant support for the legs, either powder coated or chrome-plated.

Creva bench on 4 wooden legs

The stool bench with upholstered seat and solid beech legs functionally complements the stool. MDF seat core, upholstered with fabrics from the current standard collection.

Creva stool on 4 metal legs

A stool featuring tubular steel legs, the seat base consists of a deep-drawn sheet steel construction, both are powder coated. The seat has a plywood core, with an upholstered pad and covered with a fabric from our standard collection. The bar stool has the same construction as the stool, however adapted for sitting at a counter or high tables. The footrest offers a pleasant support for the legs, either powder coated or chrome-plated.

Product data

Creva stool on 4 wooden legs

Accessories

- Plastic glides with felt
- Felt glides
- Protect glides

Weight: 2.5 kg

Weight: 6.0 kg

Creva bench on 4 wooden legs

Accessories

- Plastic glides with felt
- Felt glides

Weight: 3.6 kg

Creva stool on 4 metal legs

Accessories

- Plastic glides with felt
- Felt glides
- Protect glides

Weight: 3.5 kg

Weight: 7.5 kg

¹ The DIN seat height was determined acc. to DIN EN 1335-1, i.e. the seat height measured by means of a measuring device at the position of the ischial tuberosity (sitting bones) after having placed a load of 50 kg on the half width of the seat.

Materials

Creva stool

Seat

- Natural beech or stained (models on wooden legs)
- Upholstered seat (bench, models on metal legs)
- Standard foam
- Optional available with upholstery with flame retardant foam resp. with flame retardant foam and fireproof fabric

Wooden legs

- Natural beech or stained
- Footrest powder coated or chromed (bar stool)

Metal legs

- Steel powder coated
- Footrest powder coated in the colour of the frame or chromed (bar stool)

Fire Prevention

Excerpt

Fire Prevention

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention regulations. Kusch+Co has worked out individual solutions:

Wooden parts

As standard, wooden parts are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of "low flammability" acc. to DIN EN 13501 B s2 d0.

Upholstery

The upholstery is optionally available with flame retardant foam. In addition, it is available with the Kusch+Co Fire Prevention Concept, consisting of a special fabric "flamline" (approved by the building authorities and A2 nonflammable according to DIN 4102) between the upholstery foam and the fabric.

This concept achieves four life-saving objectives. The seating:

- is self-extinguishing,
- reduces the smoke development,
- prevents an incipient fire from spreading out,
- does not turn into an additional ignition source.

Test reports in compliance with national and international standards document the laboratory fire tests conducted on different series finished with a wide variety of materials.

With regard to the upholstery, e.g. with leather, artificial leather as well as many textile fabrics, or to our unupholstered variations featuring a plywood, laminated or plastic seat shell, most of our series meet the following standards:

- Germany: DIN 66084 P-a
- France: NF D 60-013
- Great Britain: BS 5852 Crib 5
- Italy: UNI 9176
- Europe: EN 1021 part 1/2

Please contact us if you wish to receive the test reports.

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

All variations of series 6800/6850 Creva stool meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we test most of our contract seating with higher loads and cycles. On request, we conduct individual tests acc. to the customer's specifications.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure "Mission Statement Quality" providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.
