KUSCH+CO

A folding table that is easy to handle and safe to operate. The patented locking mechanism locks the legs into place when the table is turned right side up. Dependent on the variation, the tables can either be stacked on top of each other with folded-up frame or nested side by side with vertically positioned table tops.

Design by Robert de le Roi

After having successfully completed his apprenticeship as furniture maker, he studied industrial design in Kiel. During his studies, he won several design prizes. After the successful completion of his studies, he became the assistant of Prof. Hans Ell in Kassel. Since 1999, Robert de le Roi heads the Product Development Department at Kusch+Co.

Variations

Delgado rectangular folding table

This rectangular table, available in a vast array of sizes, can be easily folded up to compact dimensions. The tables can be effortlessly linked directly to each other to create large table configurations, for example.

Delgado rectangular folding table, horizontally stackable

With this variation of the table series Delgado, the table top is folded up rather than the legs. As the table features castors, it is therefore mobile and extremely flexible. On top of this, these variations can be nested side by side, taking up less storage space.

Product data

Delgado rectangular folding table

DELGADO MEETING TABLE LF RC

Rectangular folding table

Stackability

- Stackable on platform truck CART KU 5
- Stacking height 8.7 cm plus table top thickness

Handling

- Manually operated with one hand
- Mechanism automatically locks into place when the table top is in a horizontal position
- The horizontal table top is securely locked into place, no accidental flipping back
- Slender release mechanism
- Wear- and maintenance-free mechanism
- Unvarying distance between two nested tables
- It is possible to sit at the head of the table
- 2 lockable castors

Safety

- Automatic, synchronised locking mechanism for table top when in a horizontal position
- It is not possible to operate or release the mechanism when weight is on the table top
- The mechanism is neither self-actuating nor can it be released accidentally
- No visible locking hooks or pinch points
- In compliance with the stability requirements acc. to DIN EN 15372, applicable to all top sizes available in the price list

Accessories

- Plastic glides (not available for tables DELGADO MEETING TABLE TF RC)
- Plastic glides with felt (not available for tables DELGADO MEETING TABLE TF RC)

- Black castors, 2 can be locked (for tables DELGADO MEETING TABLE TF RC)
- Modesty panels (for tables DELGADO MEETING TABLE LF RC)
- Linking elements table/table

Materials

Fire Prevention, quality, sustainability

Excerpt

Fire Prevention

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention regulations. Kusch+Co has worked out individual solutions:

Wooden parts

As standard, high-grade wooden veneer finishes and high-grade wooden edges are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of “low flammability” acc. to DIN EN 13501 B s2 d0.

Table tops

Table tops with a 3-layered chipboard core, and featuring either a HPL or real wood veneer surface are project-related also available in a low flammability finish.

Please contact us if you wish to receive the test reports.

Please contact us to receive further information.

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

The tables of series Delgado meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we voluntarily test the strength of our table frames with an additional horizontal load test using higher weights and more test cycles.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure “Mission Statement Quality” providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.
