

scorpii

KUSCH+CO

With the aim of mimicking the design aesthetics of the seating series Scorpii, Uwe Sommerlade chose the same elegant steel tubes as design and constructive element for these tables, achieving a direct kinship among these series. The side frame is the trademark design feature of this series, with the legs connected to each other through a slim straight tube by a mitre joint, and welded together. The design creates a floating effect between the frame and the table top.

Design by Uwe Sommerlade

As the son of a civil engineer, he began designing his first houses and objects in his childhood. In his grandfather's carpentry, he learned early on how to handle wood. After his graduation and the completion of his carpenter's apprenticeship, he studied design in Kassel. In 1992, he co-founded the company Lepper Schmidt Sommerlade. Since then, he has developed many acclaimed products for leading companies. Following the death of Christian Lepper, he founded his own studio in 2011.

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

The tables of series Scorpii meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we voluntarily test the strength of our table frames with an additional horizontal load test using higher weights and more test cycles.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure "Mission Statement Quality" providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.
