

# arn

KUSCH+CO

Clean lines, rounded edges, following the form of the legs – a table as design object. Its design language closely matches that of the namesake seating series. This series comes with flat screwed-on plates to connect the either wooden or aluminium legs to the table top for a lightweight appearance.

## Design by Scaffidi & Johansen

Antonio Scaffidi and Mads K. Johansen both graduated from the Danish Design School in Copenhagen. Whereas Antonio Scaffidi benefits from the symbiosis between his fiery Italian temperament and Nordic culture, Mads K. Johansen was driven by his artistic passion as cabinet maker. Their creative process is centered around flawless efficiency and design as comprehensible visualization. Mads K. Johansen's life journey ended in autumn 2014.

# Variations

---

## Arn square / rectangular / round table with wooden legs

Tables characterized by a straightforward, sleek design language through the use of extremely flat screwed-on plates as stable connection between the wooden legs and the table top. The either round or rectangular table tops are available in many sizes and finishes.

---

## Arn square / rectangular table with aluminium legs

The solid wooden legs have been substituted for slightly elliptic aluminium profiles, without changing the overall design language. The aluminium legs are always fixed by means of screwed-on plates.

All square and rectangular tables Arn can be stacked in a staggered formation.

## Fire Prevention

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention regulations. Kusch+Co has worked out individual solutions:

### Wooden parts

As standard, wooden parts as well as high-grade wooden veneer finishes and high-grade wooden veneer edges are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of “low flammability” acc. to DIN EN 13501 B s2 d0.

### Table tops

Table tops with a 3-layered chipboard core, and featuring either a HPL or real wood veneer surface are project-related also available in a low flammability finish.

Please contact us if you wish to receive the test reports.

Please contact us to receive further information.

---

## Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

The tables of series Arn meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we voluntarily test the strength of our table frames with an additional horizontal load test using higher weights and more test cycles.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure “Mission Statement Quality” providing detailed information on our test procedures available to you – please contact us.

---

## Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.
