Aris Hospital

06435 The Aris hospital bed is an efficient and comfortable metal bed. The backrest can be inclined very easily.

Head and foot panel

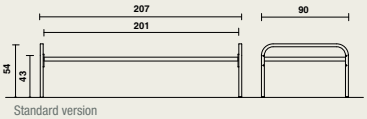
- The front frame is made of a bent square metal tube.
- The front frames are firmly bolted to the mattress platform.
- Choice between 2 panel types: a version with a low panel, or a version with a high solid laminate insert panel (*).
- Rounded corners to increase the passive safety of the bed.
- The bottom of the bed panels is equipped with synthetic glides.
- Castors with separate brakes are optionally available.

Mattress platform sections

- One- or two- (*) section metal mattress platform.
- The mattress platform is made of a frame in which rounded steel mattress platform profiles (width: 70 mm) have been welded.
- This construction can be easily cleaned and guarantees a high stiffness and an optimal mattress ventilation.
- The backrest is made of a separate hinged metal frame.
- The backrest can be inclined up to +/- 70° by means of a gas spring.
- The gas spring is activated by a lever that is within reach on both sides of the bed.
- The 2 bed corners at the head end are equipped with cases to install an IV rod or a lifting pole (only available with a two-section mattress platform).

Dimensions

- Width: 90 cm. Length: 207 cm
- Height of the mattress platform: ± 43 cm
- Safe working load: 200 kg
- Weight (without accessories): 43 kg
- Mattress platform dimensions: 201 x 90 cm (std version)
- Mattress dimensions: 195 x 85 cm
  Thickness: 12 to 15 cm



Standard version
